

## Welding Solutions

### What we can offer to our clients?

We have capabilities of welding of almost all types of structural steels.

Our Quality of welding is guaranteed by certificates in standards EN ISO 3834-2 and DIN 18800-7 class B. We can satisfy the customer's high demands with:

- Proper welding equipment for manual (MAW and GMAW) and mechanized Submerged Arc Welding;
- Qualified welders and operators certified according EN 287-1 and EN 1418;
- Approved Welding Procedure Specification for most common structural steels;
- Welding supervisor with degree International Welding Engineer;
- Contract with accredited laboratories for destruction and non-destruction control;
- Well organized workshop suitable for preparing and welding of small and big parts;
- Assembling of metal constructions on site;
- Quick expanding of the scope of the welded materials.

### What are our expectations?

In the course of our campaign called "STRIMONA OUTSOURCING", which is based on the favorably business atmosphere in Bulgaria we do expect an interest to be shown towards us in relation to:

- Developing and manufacturing of welded parts or constructions for buildings, machinery, auto industry, oil, gas and chemical industry, off-highway and mining industry, military vehicles and equipment, production of different kind of vessels and etc.
- To be involved in European projects trough co-operation;

The right welding workshop ...  
...for every project!
